

REMOVABLE INSULATING CHAMBER

for grooved rail

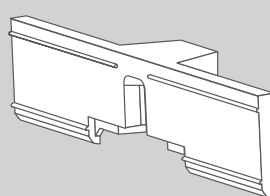

Components

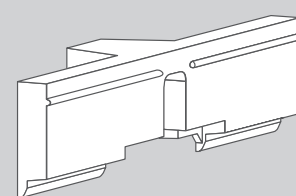

Full assembly

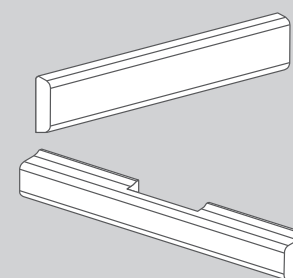

Rubber bed plate

Rubber piece on rail groove side

Rubber piece on rail head side

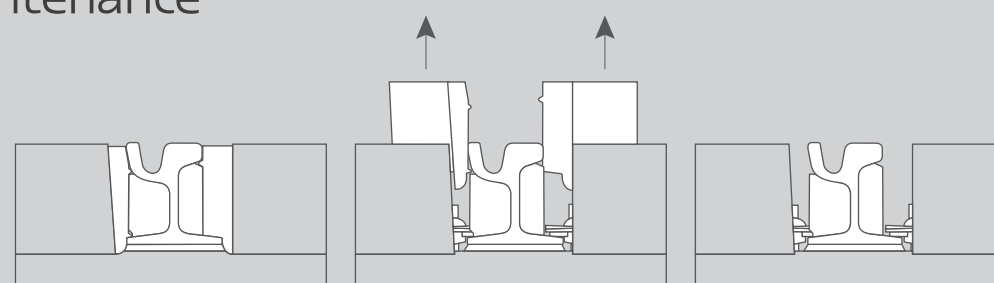

Internal elements

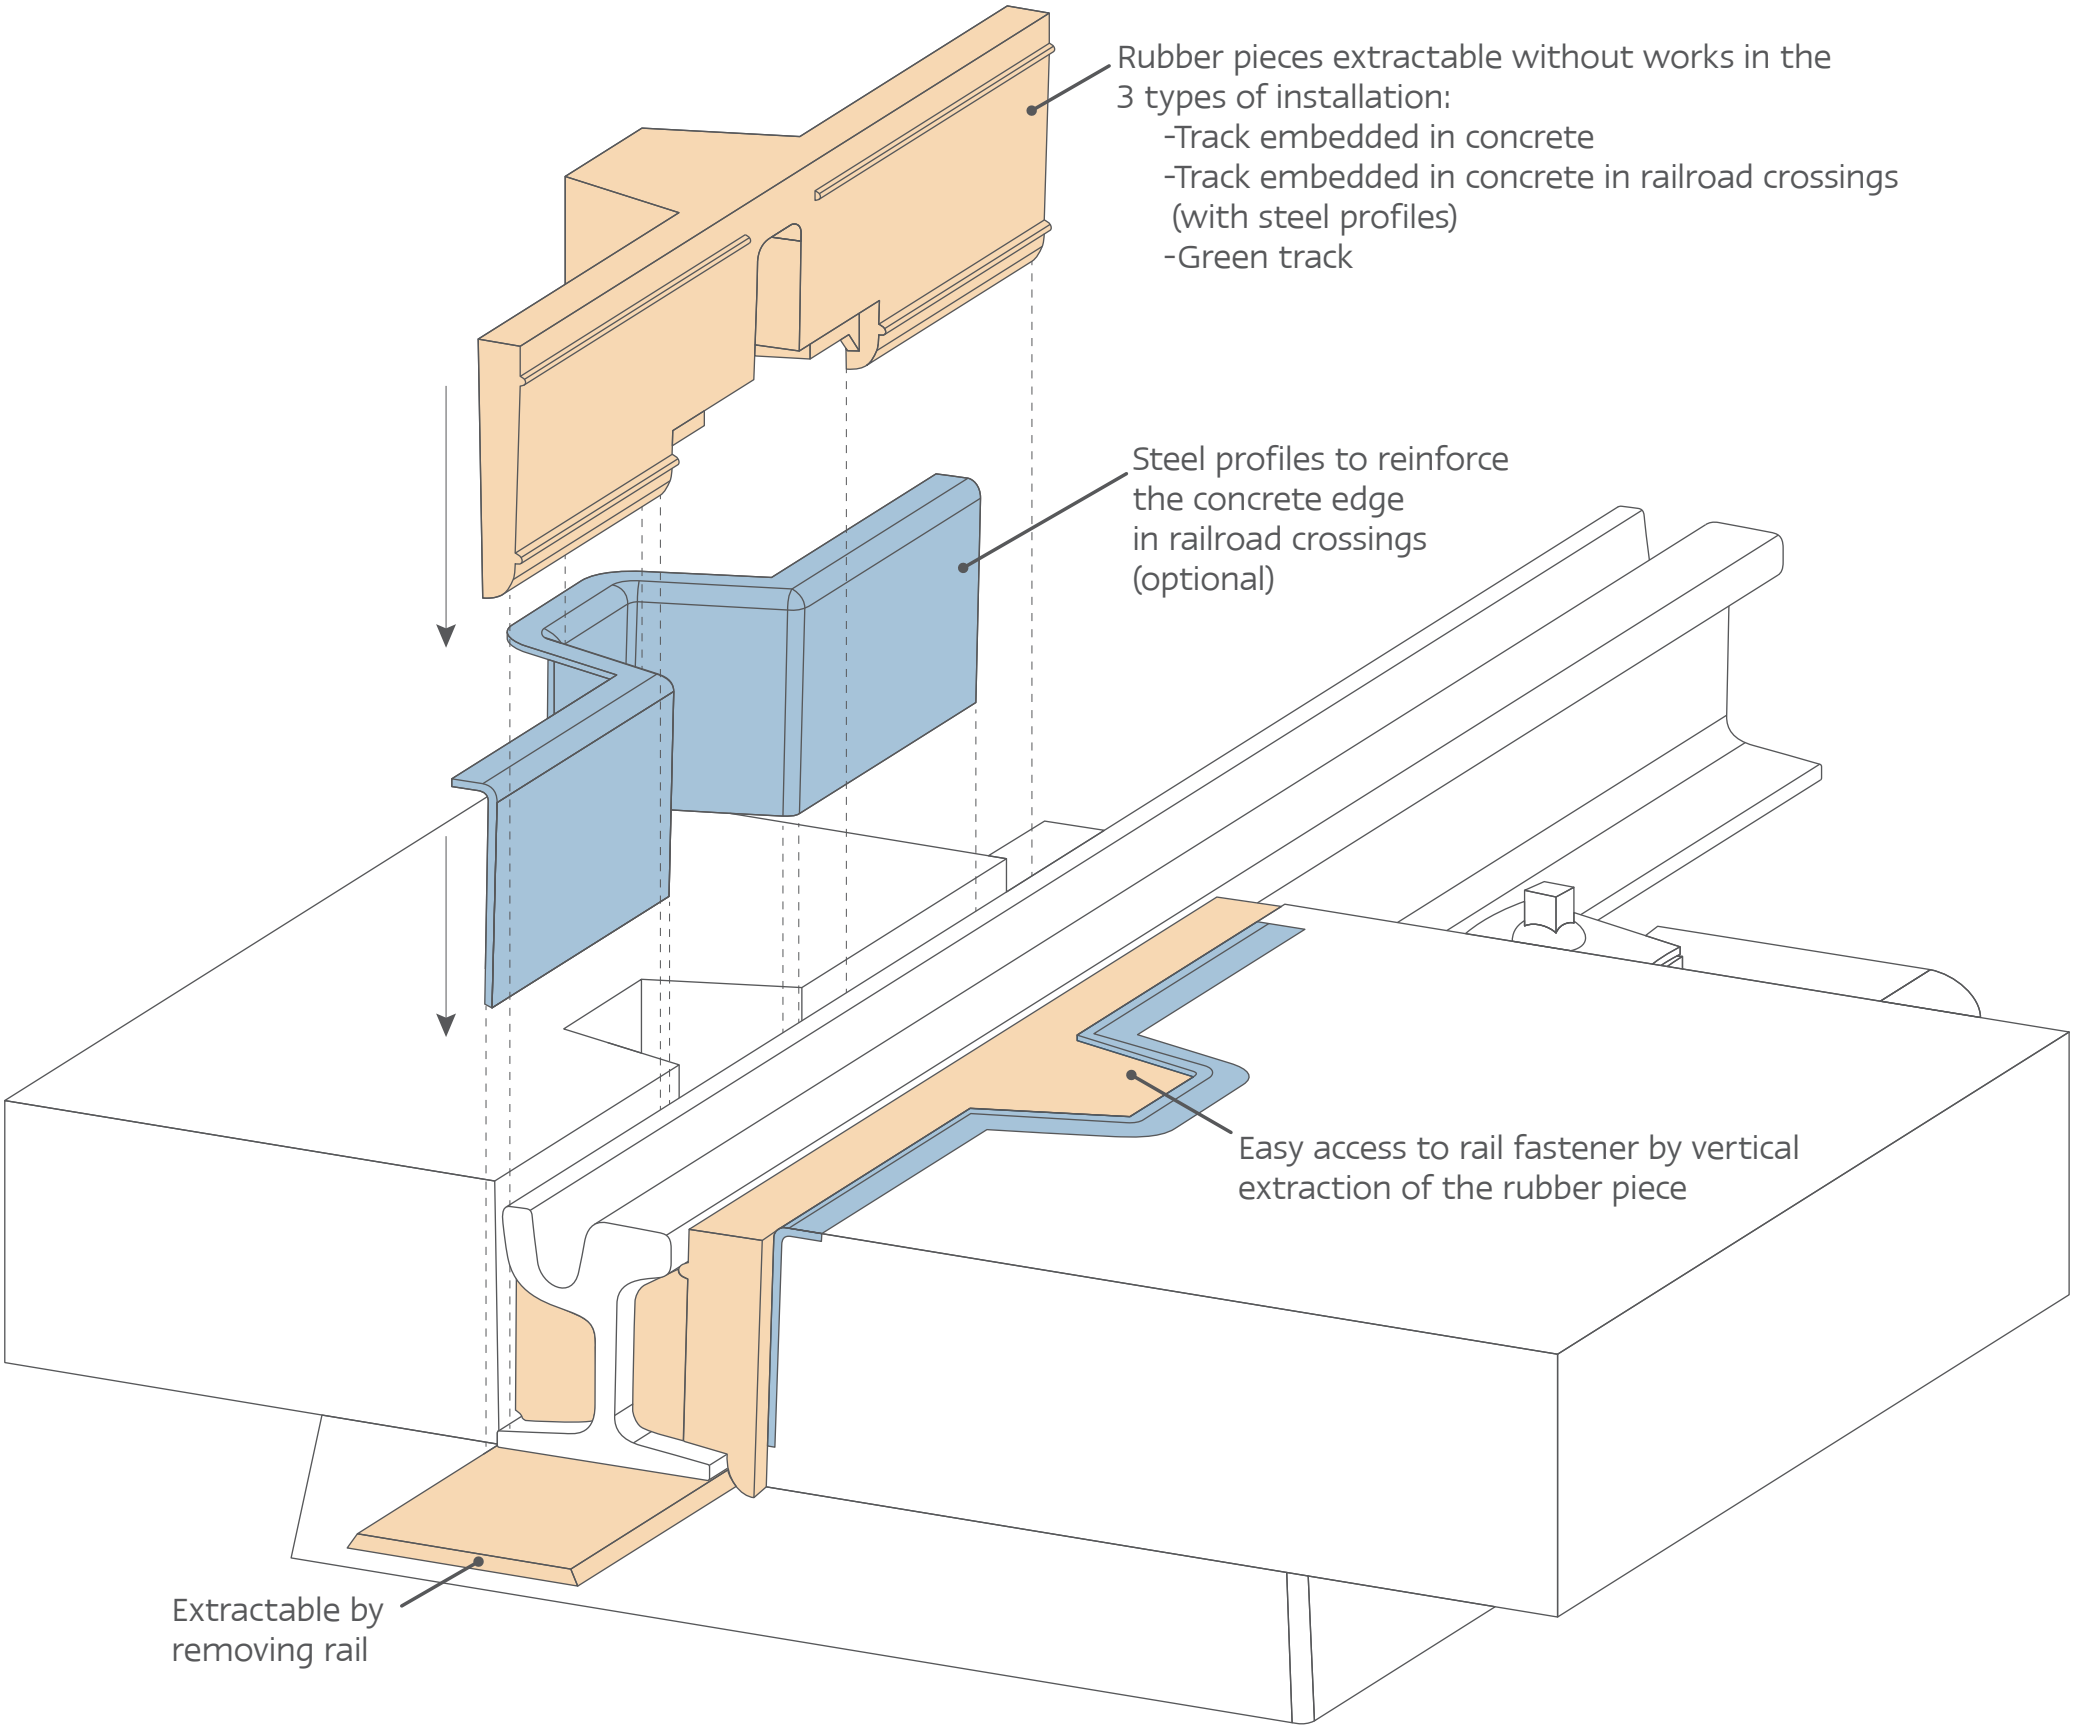

Performance

-  Rail replacement without civil works
-  Electrical and acoustic insulation of the rail
-  Manufactured using recycled material
-  Compatible with a variety of fasteners and tracks coverings
-  Saves time and maintenance costs
-  Compatible with railroad crossings

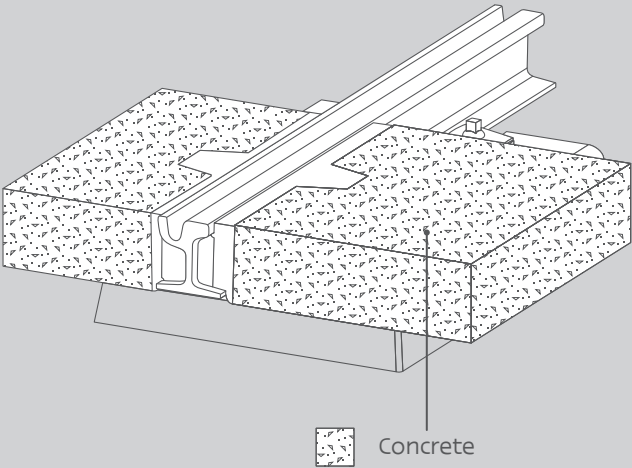

Maintenance

Vertical extraction and replacement of the pieces without requiring demolition of the track covering

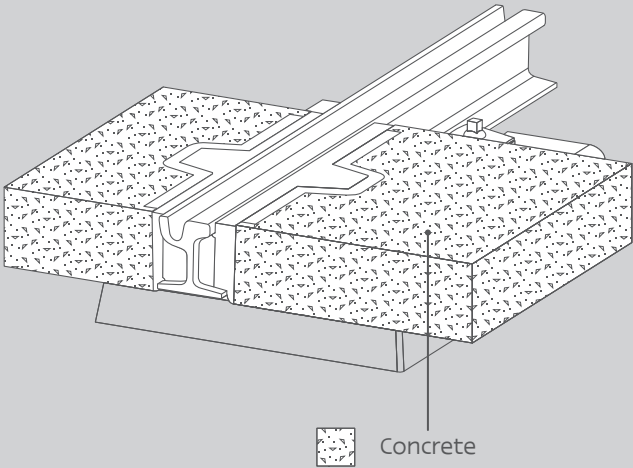

| Types of installation

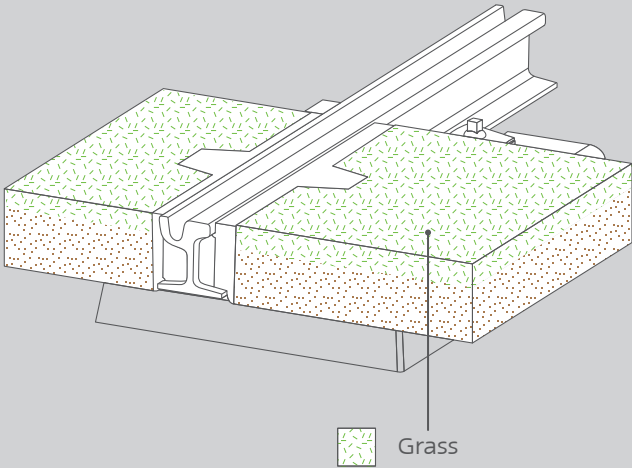

Track embedded in concrete

No railroad crossing
No steel profiles

Track embedded in concrete

Railroad crossing
With steel profiles

Green track

No steel profiles
